

Daniel Reeves — Senior Platform Engineer

Phone: +1 (415) 555-0142

Email: daniel.reeves@example.com

Location: San Francisco, CA

Summary

Platform engineer with twelve years of experience building high-availability distributed systems at scale. Specialised in service mesh, observability, and capacity planning. Previously led the infrastructure platform team at a publicly traded fintech.

Experience

Staff Engineer — Northbeam Capital (2021–present)

Led the migration from monolith to event-driven services. Reduced p99 order-path latency by 38% over four quarters. Mentored six senior engineers; introduced the platform RFC process.

Senior Engineer — Sutter Health Digital (2017–2021)

Owned the patient-portal ingress and authentication stack across three regions. Drove SOC 2 Type II certification for the platform.

Education

BSc Computer Science — University of Edinburgh (2013)
